Hvorfor er det viktig?

Data Centres Of The World Will Consume 1/5 Of Earth's Power By 2025

By [João Marques Lima](#) | PUBLISHED: 05:30, 12 December, 2017 | UPDATED: 00:32, 12 December, 2017

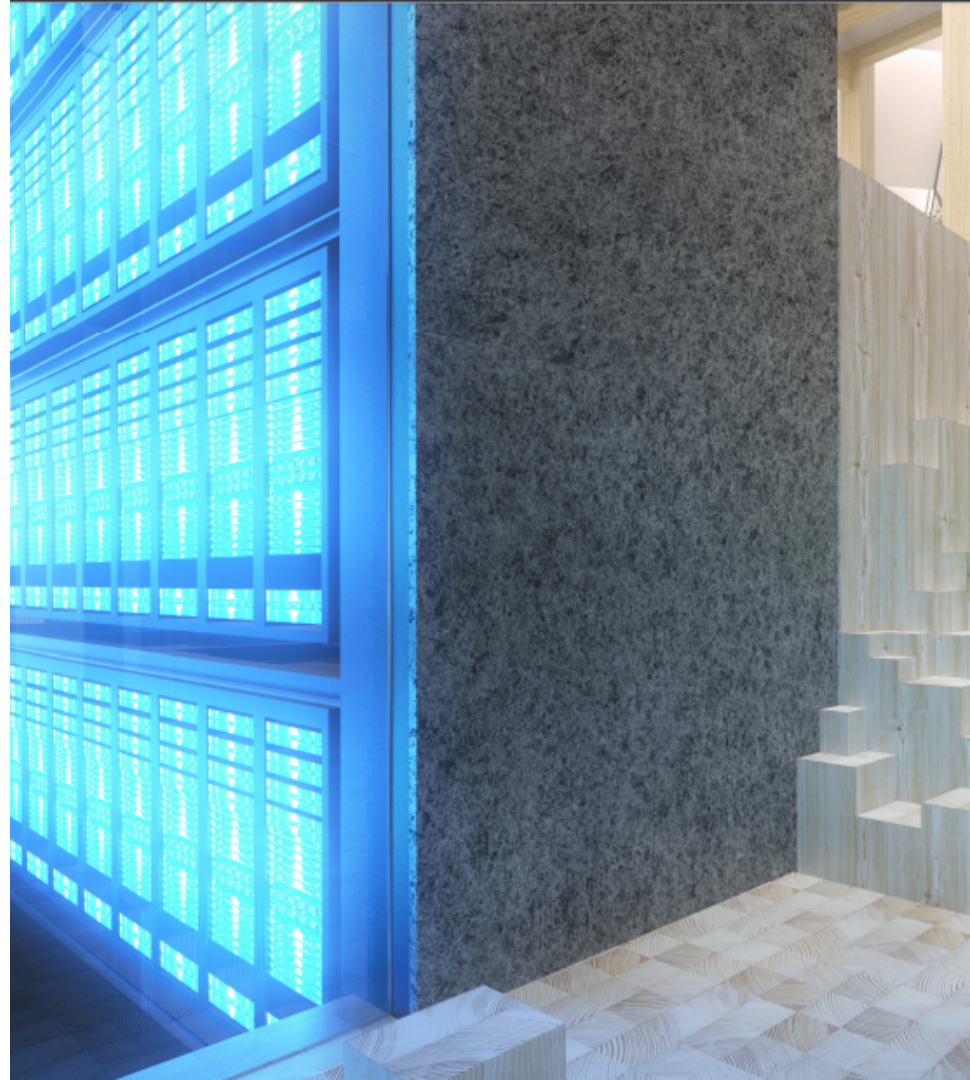

Aerial view of Tencent's biggest data center under construction in a mountainous area of Guizhou province, on March 13, 2018.

Hong Kong (CNN Business) – China's data centers produced 99 million metric tons of carbon dioxide last year, the equivalent of about 21 million cars on the road, according to a new report.

Skaper muligheter for
Jæren!

A man and a young boy are sitting on a large, dark rock on a beach. Both are wearing VR headsets and looking out towards the ocean. The sky is a mix of blue and orange, suggesting sunset or sunrise. The ocean is visible in the background with some small waves.
